Dear Parents,

If you enjoy reading aloud to your children, you’ll love this news from Seton. Six new, charming Read-Aloud books have been added to Seton Home Study School’s Pre-K curriculum. Turn the page for a peak at these lovely new titles that you may purchase individually, or as a set.

We continue adding to our collection of quality literature for the whole family because we believe that the joy of learning is nurtured by a love of reading – for both young and old! Throughout these pages you will find a wonderful selection of classic children’s literature, historical fiction, and saint biographies.

I hope this catalog is helpful to you. We continue both creating, and searching for, the finest products to help you educate your children and strengthen their Catholic Faith.

May God bless you and your families,

Chip Hibl, Director
Seton Educational Media
Read-Aloud Books

A childhood without books - that would be no childhood. That would be like being shut out from the enchanted place where you can go and find the rarest kind of joy.

-Astrid Lindgren, author of Pippi Longstocking

As homeschooling parents, our worlds revolve around instilling a joy of learning in our children, a curiosity to go and find out. Such curiosity begins with a love of reading. Children who learn to love stories on their mother’s laps learn to love learning, and education becomes a natural thing that is lived rather than manufactured.

Toward that end, and to pass on our joy in reading to our children, we’ve selected six wonderful picture books to include in our Pre-Kindergarten curriculum.

At Seton, we believe that parents should be spending time every day reading aloud to their children. We think that adding six of our favorite books will help you enjoy that time even more!

Will You Bless Me? - Trilogy Gift Box

The Queen and The Cross
In this fabulous and instructive blend of tale and history, children will be inspired by the lore and legend of the Faith. Boys and girls alike will be captivated by Helen – a heroic empress on a mission – and will be encouraged to treasure the Holy Cross in their own lives!

Miss Rumphius
Alice made a promise to make the world a more beautiful place. This beloved, classic celebration of nature – a winner of the American Book Award – has a timeless quality that resonates with each new generation.

Blueberries for Sal
When Sal wanders to the other side of Blueberry Hill, she discovers a mama bear preparing for her long winter. With its expressive line drawings and charming story, this Caldecott honor book has won readers’ hearts since its first publication in 1948.

Heavenly Helpers
These four, beautifully illustrated, books from the Daughters of Saint Paul are the perfect means to familiarize young children with the life of Jesus and His Saints.

Johnny Appleseed
Rhymed text and illustrations relate the life of John Chapman, whose distribution of apple seeds and trees across the Midwest made him a legend and left a legacy still enjoyed today.

Johnny Appleseed

Annie and the Wild Animals
When Annie's cat disappears, she attempts friendship with a variety of unsuitable woodland animals. The borders of the pages forecast the emergence of spring, and the birth of kittens.

Create a Legacy of Loving Books
In these Pre-K years, to settle on the sofa and explore a world of magical happenings, funny characters, and happy endings is not only necessary to the development of a reader, but bonds parent and child in a meaningful way. These memories will stay with your children, and, in time, their children.

Whether you are young or not so young, picture books beckon you to sit and listen; to laugh, to wonder and to delight. We hope that you find these selections as delightful as we do.

Mary Ellen Barrett is mother of seven children and two in heaven, wife to David, and a lifelong New Yorker. She has homeschooled her children for eleven years using Seton and an enormous amount of books. She is editor of the Seton Magazine, and also a contributor to The Long Island Catholic.
Early Literacy for Young Catholics

Exciting Coloring Pages  Colorful Activity Sheets  Educational Pre-K Exercises

Filled with hundreds of illustrated exercises and activities that make learning fun, this beautiful book introduces your child to the wonders of God's creation that we experience in our lives. Our Catholic Faith is an important part of the exercises. After all, children learn by doing. Your child will absorb many things important for his or her future just by being, observing, and doing.

Phonics

**Phonics 1 for Young Catholics Parts 1 & 2**
This well-designed and colorful set of workbooks is based on traditional phonics methods which teachers, especially in Catholic schools, have used for many years to teach phonics and reading with proven success.

Students start by learning the most easily pronounced consonant sounds, followed by the more difficult ones. They then slowly proceed through short then long vowels.

Catholic concepts, values, and family life are emphasized by the original art and the lovely poems that are found throughout the book. Perforated pages make using these wonderful books easier for parent and child. Includes helpful phonics rules.

A Complete Music Program for Homeschoolers
Adventus musical instruction offers families highly engaging, interactive music and piano learning solutions. The curriculum begins with the award-winning Children’s Music Journey and is followed by the Piano Suite Premier. Together, they include over 20 levels for beginner to advanced-intermediate piano students.

Recommended by music educators and parents, the Adventus curriculum is delivered in an innovative and motivational style that is easily integrated into a home study routine. Day-by-day lesson plans include detailed lesson objectives, activity sheets, quizzes and assessments, plus hundreds of helpful tips from experienced educators. Frequent assessments are included so parents can regularly monitor progress.

Recent studies show that learning to read music and play the piano increases a child’s rate of learning in math, science, and reading. In addition, a challenging music program improves students’ overall attitude towards learning.

It has been less than one year since we purchased this software, and my six-year-old is already reading music!

Phonics

Phonics for Young Catholics
In this text, students will learn reading through systematic phonics. Children will memorize sound and symbol relationships, learn letters and sounds step-by-step, and listen to Catholic poetry.

The phonics method used in this text is based on Sister Monica’s phonics approach. This is a traditional phonics method used for many years. It builds upon methods taught in previous grades and leads to proficiency in reading skills.

With the completion of Phonics 2 for Young Catholics, your child should be able to say the sounds of the letters, write the letters, and even write words which correspond to the sounds. 130 pp.

**Spring Tide**

It is A.D. 343 in West Britain, and even in this far-flung province of the Roman Empire, Christians are not safe from renewed imperial persecution. Two friends meet and befriend a young Christian priest, who is later captured and imprisoned. Aided by a Roman soldier who has secretly converted to Christianity, they set out to rescue the priest, but with unexpectedly grave consequences. Ultimately they play a part in bringing about the “spring tide” of hope that will eventually result in the Edict of A.D. 313, in religious tolerance for all Christians.

Saxon Algebra 1/2 (3rd Edition)

This Catholic textbook covers the historical period from the Discovery of America to the 2008 election. The text is a major improvement over the previous edition for two reasons. First, The History of the United States contains hundreds of color pictures, maps, and graphs. Second, it reads like an exciting adventure story.

The book is interesting, challenging, and a pleasure to read. It is written especially for 8th graders, but most 7th graders will enjoy the book as well. The only difficulty you may find is in having your student put down the book.

This is a story of daring discovery, courageous exploration, and bold expeditions. Students learn about the struggles and joys of the dedicated men and women who helped build our great nation.

This colorful textbook contains review questions throughout the 32 chapters and end-of-chapter questions to help the students focus on the important content.

A Perfect Gift for Family and Friends!

Reading 8 for Young Catholics – Comprehension

Reading 8 for Young Catholics – Thinking Skills

A must-have workbook to prepare for high school. This workbook will develop the thinking skills of observation, comprehension, and synthesis. Each lesson has two sections: one from classic literature and one from the exciting life of St. Joan of Arc. Sections are followed by questions that focus on characterization, plot, and theme. Illustrations. Answer key in book. 108 pp.

Reading 8 for Young Catholics – Vocabulary

Workbook to help build strong vocabularies. Students use a dictionary, exercises, and explanation of the words. Short, interesting, stories are used to learn new words and gain a better understanding of how words are formed and used.

Religion

Witness to the Faith

Students will study the 2,000-year history of the Catholic Church. The history of the Church begins with struggle and persecution, as the invincible Roman Empire tries to stamp out the flame of the Faith. But the flame burns too brightly in the hearts and minds of Catholics. Our story follows the Faith down the centuries as the Catholic Church faces the threat of the Muslim invasion of Europe, the Protestant Revolt, and the wars of religion. It concludes with the election of Pope Benedict XVI.

It is the story that began almost 2,000 years ago on the shores of the Sea of Galilee. For it was then that Our Lord made a promise to a simple fisherman: Thou art Peter, and upon this Rock I will build My Church, and the gates of Hell shall not prevail against it.

This text, which reads like an exciting adventure story, uses hundreds of full-color pictures to put events in historical perspective. Review exercises are included at the end of each chapter. Glossary. Index. Answer key in book. 5 1/2” x 8 1/2” . 519 pp.

Science

Life Science for Young Catholics

An engaging, comprehensive Life Science program. Seton’s newest Science book is filled with hundreds of high quality diagrams, photos, and illustrations. Written and reviewed by Catholic medical doctors, the well-designed presentation, using clear explanations and bright, colorful pictures, makes even challenging concepts easy to understand!

Section reviews and glossary modules throughout the text complement and reinforce the retention of ideas and concepts.

The first half of the book includes chapters on the Science and Chemistry of Life, beginning with the Cell and Single Celled Organisms, and progressing through Fungi, Plant, and Animal Kingdoms. The focus of the second half is human biology and contains chapters on the different systems in the human body. The text is designed to prepare students for High School Biology and includes chapter reviews, crossword puzzles, a glossary, and an index. Answer Key in book. 255 pp.

Vocabulary

Vocabulary 8 for Young Catholics

The final workbook in our Vocabulary series! Twenty lessons of entertaining stories introduce 300 vocabulary words. Through the context of a story, the student learns the meaning and correct usage of new words, and often learns new meanings for familiar words. Use of synonyms, antonyms, exercises, and crossword puzzles contribute to the learning experience and prepare your eighth grade student for high school.

Alternate Vocabulary Curriculum

Wordly Wise Book 5

Workbook to help build strong vocabularies. Students use multiple choice, fill-in-the-blanks, and crossword puzzles to learn new words and gain a better understanding of how words are formed and used. Student 144 pp.

Primary Grades

Home Study Kits for Saxon Math K-3 include:

- **Teacher’s Manual** - specially written to provide grade appropriate language and activities. Scripted format provides directions, and a discussion guide that includes student responses.

- **Student Workbook** - contains practice pages and assessments bound in two workbooks, and also includes cards for daily number fact practice. Not available for Math K.

- **Meeting Book** - is used during the daily parent-child meeting. During the meeting, the child will practice skills relating to counting, time, temperature, money, the calendar, and more.

Math K
Math K includes everything you need to teach Kindergarten math concepts to your child. Includes oral counting, acting out addition and subtraction stories, telling time to the hour, and other basic math skills.

Math 1
Math 1 teaches basic concepts with fun, effective methods. Introduces reading numbers, telling time, counting money, understanding the calendar, and other basic math concepts.

Math 2
Math 2 is integrated with other levels for continuous progress in working with larger numbers, geometric shapes, Venn diagrams, graphs, basic arithmetic calculations, and simple fractions.

Math 3
Math 3 helps children master all basic addition, subtraction, multiplication, and division facts. Including: reading to 999, adding, subtracting, multiplying, and dividing by nine, map scales, complex fractions; and more.

Manipulative Kit - is a recommended supplement in all Saxon Math K-3 programs. Includes 450 objects, counting games for “hands on” learning, and a sturdy storage container.

Upper Grades

Home Study Kits (below) include hardback textbook, textbook answer key, and tests with test key. Solutions Manuals show step-by-step solutions to each problem, and are available at an additional charge.

Algebra 1, 3rd Edition
Algebra 1 covers all topics in a first-year algebra course, from statistics and probability to algebra-based, real-world problems. Students begin developing the more complex understanding required for advanced mathematics. You receive a new textbook with your purchase of a Home Study Kit. The purchase of a solutions manual is recommended.

Algebra 2, 3rd Edition
Algebra 2 includes extensive lessons in Geometry. The equivalent of one semester of informal geometry, with a continuation of essential Algebra concepts from Algebra 1. Real-world problems are included along with applications to other subjects such as physics and chemistry. Test key is included in test booklet.

Advanced Mathematics, 2nd Edition
Advanced Mathematics interweaves concepts from Algebra, Geometry, Trigonometry, and Discrete Mathematics for a full understanding of advanced mathematics. Conceptually-oriented problems help students prepare for college entrance exams such as the SAT and ACT. Word problems become progressively more elaborate. Used after Algebra 2 and before Calculus.

Calculus, 2nd Edition
Calculus fully treats all topics normally covered in an Advanced Placement AB-level Calculus program, as well as many topics for a BC-level program. Successful completion of Calculus will help students score well on AP exams. Instruction takes full advantage of graphing calculators. Note: Enrollment in Seton’s Calculus course requires the 1st Edition text.

Saxon Geometry
Saxon Geometry includes all topics in a high school geometry course, including proofs, perspective, space, and dimension associated with practical and automatic geometry. Students learn how to apply and calculate measurements of lengths, heights, circumferences, areas, and volumes. Geometry introduces trigonometry and allows students to work with transformations. Solutions Manual is included in the Home Study Kit, as well as Seton’s own Solutions Manual Supplement.

SAXON PRICES SUBJECT TO CHANGE WITHOUT NOTICE.

Middle Grades

Home Study Kits for Saxon 5/4 to 8/7 include:

A textbook, solutions manual that shows step-by-step how to solve each problem in the book, and a tests and worksheets booklet that is the only consumable in the kit. All books are paperback.

Math 5/4, 3rd Edition
Math 5/4 is an introduction to basic mid-level math concepts such as whole numbers, computation algorithms, geometry, patterns, and sequences.

Math 6/5, 3rd Edition
Math 6/5 expands on Math 5/4 with more advanced lessons on divisibility, integers, primes and composite numbers, powers, roots, and probability.

Math 7/6
Math 7/6 helps improve preparation for high school math by introducing concepts your child will need for upper-level Algebra and Geometry.

Math 8/7, 3rd Edition
The Math 8/7 program is for students who have completed Math 7/6. Includes a range of upper-level skills and concepts, such as scientific notation, complex statistics, arcs, sectors, and the Pythagorean Theorem.

Algebra ½, 3rd Edition
Algebra ½ covers all topics normally taught in Pre-Algebra, as well as additional topics from Geometry and Discrete Mathematics. Includes hardback textbook, textbook answer key, and tests with test key. The Recommended Solutions Manual is available at an additional charge.

Interactive Math Software

What are Interactive Math CD-ROMs?

They are like having a personal tutor skilled in Saxon Math. The program goes lesson-by-lesson through the entire Saxon math book, presenting the mathematical concepts from each lesson with detailed examples. Perfect as an instructional tool, or as a useful review, these programs are very popular with homeschooling families who use the Saxon math series. These instructional CD-ROMs are very easy to use, and run on both Macintosh and Windows operating systems. The student simply puts the CD-ROM in the computer and selects the lesson he has scheduled for the day. The lessons are taught using a "whiteboard" which fills up most of the computer screen, and makes the teacher’s writing easy to see.

D.I.V.E. lessons are 10-20 minutes long. After the new concepts are taught in the first part of each lesson, the student works out the D.I.V.E. example problems, and then views the correct explanation.

Saxon Teacher or D.I.V.E.

What’s the Difference?

Both interactive video supplements provide an excellent presentation of each lesson in the Saxon text, and teach the math concepts in a most adequate manner.

The new Saxon Teacher is the official supplement to the Saxon Home Study Program. The lessons are longer, taking 20-30 minutes, and use actual problems in the textbook. The professional math instructor walks the student through each lesson in the textbook, as well as each problem in the practice set and problem set. The subject is covered on four or five Lesson CDs, and one Test Solution CD.

The lessons are shorter in D.I.V.E. into Math, often covering the day’s lesson in 10-20 minutes. Dr. Shormann, the instructor, uses representative problems to illustrate the lesson’s concepts. The subject is covered on one or two CDs.

Both are compatible with Windows and Mac.

D.I.V.E. CD-ROMs are $50.00

D.I.V.E. into Math is available for all Home Study Editions 5/4 through Physics, and for other editions as well.

Math-U-See Series

Math-U-See’s unique instructional approach makes it easier for parents to help students progress in mastering fundamental math skills and concepts. Math-U-See’s simple but powerful set of colorful manipulatives allows abstract math concepts to be represented in clear, relatable ways. These manipulatives, combined with distinctive strategies presented through videos, textbooks, practice, systematic review, and assessments, guide students from concept to concept as they build a solid understanding of mathematics. Because the focus is on understanding math concepts, the curriculum is not organized traditionally by grades. Rather, Math-U-See is a skills-based program that focuses on student mastery.

**Primary Mathematics (Grades 1-6) - U.S. Edition** (non-common core)

Students learn through concrete and pictorial methods before moving into abstract thought and development.

This approach encourages an active thinking process, thoughtful communication of mathematical ideas, and engaged problem solving. Note: this general approach differs from Saxon’s, which takes a more step-by-step procedural approach to problem solving.

Interactive and Engaging Learning at Apologia

General Science, Second Edition
- Extensive section on human biology
- Designed to be a student's first systematic introduction to the sciences
- Covers topics such as the scientific method, simple machines, archaeology, geology, and more
- Many hands-on experiments

Physical Science, Second Edition
- A great preparation for college science courses
- Contains many hands-on experiments that all use household chemicals and supplies
- Discusses such topics as the atmosphere, the movement of the earth at the center, environmentalism, the physics of motion, Newton's laws, gravity, and astrophysics

Improve Student Learning with Apologia Student Notebooks
- More than a simple "notebook", Apologia's Student Notebooks integrate impressive photos, graphics, and diagrams that help to reinforce and deepen understanding of the subject matter.
- Your student will find it easier than ever to study and retain material studied with the help of these fantastic student notebooks.

MARINE BIOLOGY

Exploring Creation with Marine Biology

- Focuses exclusively on Marine Biology and marine habitats. Eight modules cover all aspects of life in the sea, including oceans, how life sustains itself in the ocean environment, sea-dwelling organisms from kingdoms Monera, Protista, Fungi, and Plantae, marine invertebrates, marine vertebrates, and marine ecology

Chemistry, 3rd Edition Book Set

- Well illustrated text covering significant figures, units, classification, the mole concept, kinetics, and more
- Prepares students for a university-level Chemistry course
- In order to understand this advanced text, the student needs to have completed Algebra I
- The first science course written by Dr. Wile, it took the homeschooling community by storm and set the stage for the rest of the Apologia courses

<tr>
<td>Following Christ in the World</td>
<td>Written by Anne Carroll, this excellent senior high school apologetics text covers traditional topics, as well as issues pertinent to the modern world. Armed with this knowledge, students will be able to share the truths of the Faith by showing its logic, coherence, and beauty. They will be able to show that Catholic doctrine is reasonable, and that there is complete harmony between faith and reason. Students will receive the greatest benefit from this text if they have had instruction in the fundamentals of Catholic Doctrine. For that, Fr. Laux’s series (below) is first-rate. Father’s books as well as Anne Carroll’s are used in Seton’s high school Religion program. 141 pp.</td>

THE OFFICIAL SAT STUDY GUIDE
NEW! 2018 EDITION
The 2018 Edition of the Official SAT Study Guide doubles the number of official SAT® practice tests to 8—all of which are created by the test maker, and which include 250 additional pages of instruction, guidance, and test information. As the most recent edition of this best-selling SAT guide, you can be sure that the guidance and practice problems reflect the most updated information and most relevant test-taking tools.

THE OFFICIAL ACT PREP GUIDE
NEW! 2018 EDITION
Revised and Updated is the must-have resource for college-bound students taking the ACT — and the only handbook for ACT preparation from the makers of the exam. The book and online content include actual ACT test forms (taken from real ACT exams). This new edition offers students updated data on scoring the writing test, new reporting categories, and tips on how to do your best preparing for the test on actual test day. Also included are an additional 400 practice questions that are available online.

THE IOWA® PRACTICE TESTS
Iowa Practice Tests are available for Grades K-12. Short practice tests familiarize students and administrators with the question type and test format found on the exam. Directions for Administration read like a script, and students mark their answers as in an actual test.

STANFORD PRACTICE TESTS
Gives students an idea of what to expect on test day, and increases confidence in test-taking. Sample questions are given in each category for a specific test. Answers are provided in the Directions for Administration booklet. For Grades K-8.

SCORING HIGH ON THE IOWA
One of the most comprehensive preparatory resources available for the IOWA Tests of Basic Skills®, this workbook is appropriate for Grades 1-8. Not only an excellent introduction to the question type and test format found on the exam, but also a thorough review of the subject matter and skill sets tested. Available in a Student Edition, Teacher Edition, and/or Answer Key.

COGAT PRACTICE TESTS
The CogAT® (Cognitive Abilities Test) Practice Test Kit is available for Grades 2-12. Short practice tests not only familiarize your students with the types of questions asked on abilities tests, but also prepare students and administrators for the testing format on the exam. A useful tool for those preparing for a learning abilities test.

SCORED HIGH ON THE TERRANOVA/CAT 6
One of the most comprehensive preparatory resources available for the Terranova/Cat 6 Test, this workbook offers your students a thorough review of the subject matter and skill sets tested. Available in a Student Edition, Teacher Edition, and/or Answer Key.

The Iowa® Form E Assessments from HMH Publishing are achievement tests that assess students’ skills in Reading, Language, Mathematics, Social Studies, and Science. The tests assess both foundational skills and higher-order thinking skills, providing national and local comparisons. Testing with the Iowa Assessments can provide information that may be used to improve instruction and student learning.

Form E tests have updated questions (copyright 2012), and compare your students with newer norms (2011) so that they can be more accurately assessed. In addition, the Form E includes Lexile® Measurements for Grades 1-12. These user-friendly books are in four-color, and take less time to administer than many other tests.
